

Annexure-IV: Selection Criteria

Mandatory Selection Criteria for all consumer segments

The beneficiaries are required to pass all the following mandatory criteria to be considered for Beneficiary Ranking Criteria.

Sl. No	Criteria	Yes	No	Remarks
1	Continuous cold-water supply			
2	Space availability for installation of SWHS			
3	Availability of South facing, shadow free area for collector installation			
4	System utility should be more than 6 months.			

Ranking Criteria for Residential Buildings

Name of Beneficiary:				
Location:				
Contact Number:				
Contact Person:				
Sl. No.	Criteria	Details (A:10, B:5, C:1)	Rating	Remarks
1	Current Hot water system and possibility to integrate with SWHS	A: Centralized hot water system, easy to integrate with SWH systems		
		B: Decentralized hot water system (geysers) but possible to integrate with SWH		
		C: Not possible to integrate with SWH		
2	Availability of Shadow free area	A: Shadow free area		
		B: Presence of shadow but obstacles can be removed		
3	Altitude	A: Above 3000 masl		
		B: 1500-3000 masl		
		C: less than 1500 masl		
4	System utility	A: Round the year		
		B: 9-12 months		
		C: 6-9 months		

5	Distance from nearest motorable road	A: Within range of 500m		
		B: Within range of 2km		
		C: Within range of 5km		
6	Use of conventional hot water heating techniques	A: Fossil fuels		
		B: Fuel wood		
		C: Electricity		
7	Dedicated pumping needs for feed/cold water	A: Main water source is at higher level and no dedicated pumping is required.		
		C: Dedicated pumping will be needed to feed cold water to SWH system		
		Final Score
