1	Continuous cold-water supply			
2	Space availability for installation of SWHS			
3	Availability of South facing, shadow free area for collector installation			
4	System utility should be more than 6 months.			

Ranking Criteria for Public Institutions

Name of Beneficiary:				
Location:				
Contact Number:				
Contact Person:				
Sl. No.	Criteria	Details (A:10, B:5, C:1)	Rating	Remarks
1	No of users/ person in the institute	A: More than 100		
		B: 50-100		
		C: Less than 50		
2	Availability of Shadow free area	A: Shadow free area		
		B: Presence of shadow but obstacles can be removed		
		C: More than 20m		
3	Distance between system and point of use	A: Less than 10m		
		B: 10 - 20m		
		C: More than 20m		
4	System utility	A: Round the year		
		B: 9-12 months in a year		
		C: 6-9 months in year		
5	Dedicated pumping needs for feed/cold water	A: Main water source is at higher level and no dedicated pumping is required.		
		C: Dedicated pumping will be needed to feed cold water to SWH system		
6	Altitude	A: Above 3000 masl		
		B: 1500-3000 masl		

		C: Less than 1500masl		
7	Source of energy for current water heating	A: Fossil fuels		
		B: Fuel wood		
		C: Electricity		
8	Gender equity	A. More than 50 women users		
		B. 25-50 women users		
		C. Less than 25 women users		
9	Distance from nearest motorable road point	A: Within range of 500m		
		B: Within range of 2km		
		C: Within range of 5km		
10	Availability of plumber	A: Plumber available		
		C: Plumber not available		
		Final Score
